HAWAIIAN ODYSSEY

SCENERY ADVENTURE

NOTICE: This Scenery Adventure expands the flying environment of all SubLOGIC flight simulation programs. You must have a SubLOGIC flight simulation program in order to use this disk.

Explore a tropical paradise with "Hawaiian Odyssey" Scenery Adventure! The islands contain many wonderful sights; one of them also contains a mysterious gateway to another world unlike anything you've ever seen!

Hawaii's natural beauty makes it the perfect area for both visual flight sight-seeing and VFR or IFR cross-country navigation. This disk covers the entire island chain in incredible detail. Downtown Honolulu and Pearl Harbor on the island of Oahu are exactingly recreated. The 380-mile long Hawaiian Island chain contains 26 airports, many with Visual Approach Slope Indicator (VASI) landing lights, runway threshold markings, fixed distance and touchdown zone markers. Numerous ILS, VOR and NDB nav-aids are available for instrument navigation.

Fly into the volcanic crater at Mauna Loa and you'll be transported* to an alternate universe of strange and dazzling sights, where normal concepts no longer apply. Explore this world at your own risk; things are not always what they appear to be.

"Hawaiian Odyssey" also offers the very first structured scenery adventure! Locating the hidden jewel of the goddess Pele isn't easy. You'll have to find and follow an intricate set of clues scattered about the islands that, with luck, will guide you to your goal. This treasure hunt will challenge all of your flying skills, but the reward is an experience you'll never forget!
